AI/ML Developer & Full-Stack Engineer with a strong foundation in data structures, and web architecture. Proven experience in building intelligent applications and solving algorithmic problems.

Skills

AI/ML: PyTorch, TensorFlow, OpenCV, Scikit-learn, NLTK, Spacy, BERT, YOLO, Transformers
Web Dev: MERN Stack (MongoDB, Express, React, Node.js)
Programming: Python, C++, JavaScript
Databases: MySQL, MongoDB
Other: Git, GitHub, Docker, REST APIs , Flask, Web Scraping, Streamlit UI.

Experience

Coder Roots Mohali, India
AI|ML Internship Jan 2025-May 2025

- Developed advanced proficiency in AI, ML, Deep Learning, Computer Vision, NLP and Reinforcement Learning.
- Applied TensorFlow and Keras for deep learning models, OpenCV, YOLO, NLTK for computer vision and NLP tasks.
- Built a multimodal text/Image-to-3d model using GAN and CLIP for image-text encoding with the frontend of streamlit

Education

Sardar Beant Singh State University Gurdaspur, India
B. Tech in Computer Science and Engineering 2021 – 2025
CGPA: 8.22

Govt. Sen. Sec. School Pallan, J&K
12th Non. Medical with 96% 2021

Projects

File Transfer Application

- Built using python web-socket for transferring files from one system to another.
- Use Custom-Tkinter to built its frontend.

Sign Language Interperator

- Use a trained model to predict hand sign to interpreate its meaning.
- Use Flask framework to create its api and backend.
- Frontend is developed using React JS and TailWind

DimenX AI (Image to 3d)

- Designed a voxel-based GAN using Pix3D and CLIP encoders to map 2D to 3D models.
- Use streamlit to built its frontend.
- Generated 3d model can be downloaded and use as per need.

Certificates

- **Introduction to Python**
- **Certificate of Internship in AI/ML**
